Speaker

This diagram shows an exploded view of a mechanical assembly. The components are numbered 1 through 10. The assembly consists of a base housing (10) with internal features like a central bore and mounting points. A central shaft (9) passes through the housing. A coil spring (8) is positioned around the shaft. Above the spring is a small cylindrical component (7). Four washers or spacers (4, 5, 6, 3) are stacked on top of the small cylinder. The topmost component is a circular plate or cap (2). Arrows indicate the assembly sequence and alignment of the parts.
